

Clayton Hoskinson, CCE, CFCE, CFE
Southwest Division Manager

Located in Norman, Oklahoma, **Clayton Hoskinson** serves as manager of TechnoSecure's southwestern regional facility. In a criminal justice and computer forensics career that has spanned more than 2 decades he has developed a national reputation in the field of computer forensics. Before retiring from law enforcement Mr. Hoskinson served stints with the Norman Oklahoma Police Department and the Oklahoma State Inspector General's Office. Mr. Hoskinson designed and taught one of the nations first associate degree programs in computer forensics. He is a Certified Fraud Examiner (CFE) and a Certified Computer Forensic Examiner (CCE, CFCE). Mr. Hoskinson has served as a court adjudicated expert witness and has been appointed a Special Master in computer forensics by the Federal Courts. He is a member of The International Society of Forensic Computer Examiners, The International Association of Computer Investigative Specialists, The High Technology Crime Investigation Association, The National Cybercrime Training Partnership, and various other professional organizations.

Karen Panighetti, CCE
Eastern Division Manager

Located at TechnoSecure's corporate headquarters in Erie, Pennsylvania, **Karen Panighetti** serves as manager of TechnoSecure's eastern regional facility. She holds a Bachelor of Science degree in Computer Science and has over 20 years experience in various aspects of information systems technology. Ms. Panighetti has been a Certified Computer Forensic Examiner (CCE) since 2002. She is a member of The International Society of Forensic Computer Examiners, InfraGard, The Information Systems Audit and Control Association, The Technology Council of Northwest Pennsylvania, and serves on the Board of Directors for the Institute of Computer Forensic Professionals. Ms. Panighetti has given a variety of presentations in the local region on topics pertaining to cybercrime, computer forensics and electronic discovery.

Partnering on Computer Forensics and Digital Discovery

TechnoSecure, Inc. is a privately owned corporation specializing in computer forensics and electronic discovery. As an extension of our work in the field of computer forensics we also offer data recovery services. Partnering with TechnoSecure puts a vast array of computer, investigative and business experience at your disposal. Our computer forensic examiners have a wealth of experience and are specially trained and certified in the field. We offer **FREE** initial consultations and **FREE** estimates.

Computer Forensics

A computer forensic examination is a thorough, objective, controlled and fully documented examination of digital media for evidence of interest to the client. The examination is conducted in such a manner that the results are admissible in court or other legal proceedings. The most common computer media examined are hard disk drives located inside a computer system. However, floppy diskettes, cd-rom, dvd, backup tapes, usb devices, digital cameras, cell phones, handheld computing devices and any other digital storage media are all candidates for forensic examination.

Computer evidence can be extremely important in any type of investigation or inquiry. If the “suspect” had access to a computer, there is a high probability that some form of evidence exists in electronic format. The evidence can be in a variety of forms including email, web sites visited, documents, or databases. Recovering the evidence and determining the dates and times that such activity occurred can provide a good indication of culpability along with valuable insight into what the individual was trying to do. This can significantly aid in achieving a successful resolution of the case.

Our Services

TechnoSecure offers a complete line of computer forensic services including:

- Digital or Electronic Discovery Consultations
- Computer Forensic Examinations
- Evaluation of Recovered Data
- Expert Witness Testimony

TechnoSecure has an established reputation for conducting professional examinations and ensuring the results are clear, concise, and the recommendations are executable and practical.
